

### Personal Profile

#### Enthusiastic and proactive web developer ▾

I am an enthusiastic and proactive web developer who makes attractive websites and applications "that work" from a product description derived from extensive analysis of what the client needs and requests.

With several years experience of designing and developing websites and web applications, including experience handling all aspects of a small web design business; I have an excellent understanding of how technology can be used to align the requirements of both the business and the customer.

I received an excellent education with Nottingham Trent University, acquiring Diploma of Higher Education in Software Engineering (grade 1:1 in my first year and a strong 2:1 grade in my second year), and learned extensive skills working as part of a team and on my own initiative. Whilst at university I learnt to use well known technical software such as Adobe Dreamweaver, Adobe Photoshop, Netbeans IDE and Microsoft Visual Studio.

- LCCI City & Guilds in Information Technology Level 2: Pass

#### Northfield Secondary School, 1989-1994 ▾

9 GCSE's: 7 at grade C or above

### Employment History

#### Calverton Computing, Company Director / Website Developer, 2011-Present ▾

At present I am company director and sole website developer at Calverton Computing, developing bespoke websites of all types and sizes; fixing and upgrading computers and laptops; and offering cheap hosting solutions. As well as enhancing and developing my front-end and back-end programming skills, I am also developing critical skills in money management, taxes and revenue, and every day social skills with customers. For the most recent 6 months of my time working for Calverton Computing I have been working with LeenTech Ltd, helping develop large scale online warranty claim systems for worldwide dealer and supplier networks; created using HTML, CSS, MySQL, jQuery, AJAX and Coldfusion technologies. As several developers (often in different countries) were accessing live website files simultaneously we used SVN technologies on a daily basis to avoid overwriting each others work.

#### Logobrand, Developer, 2008-2009 ▾

Whilst on my sandwich year from Nottingham Trent University, I was employed on a work placement at Logobrand as a developer. My duties were mainly to help create and develop a new web based EPOS analysis software system, which was to upgrade their current system. I also worked on their credit card sales system (Polish Amex). I developed a lot of new skills in PHP and MySQL development, and also teamwork and time management here.

#### Rathbones Bakery, Wrapping Machine Operator, 2000-2004 ▾

Whilst at Rathbones I became experienced in working on my own and with a team. Time management was a must for this position and I worked extensive unsociable hours, sometimes over 70 hours per week and finishing a shift as late as 3am on a regular basis.

## Technical Skills Summary

A Summary of Skills Acquired in Employment & Education ▾

HTML/HTML5/XHTML	CSS/CSS3	Javascript	jQuery	Object-orientated JS
Social Media API	DOM Scripting	Coldfusion	AJAX	Object-orientated PHP

## Interests & Recreational

My family life ▾

In my spare time I like to spend time with my wonderful partner and children, supporting them with all their school activities, hobbies and sports. I enjoy cooking and baking and trying new things to create for the family to enjoy. I am a Notts County Football Club fan, enjoying watching their football matches whenever possible.

School governing responsibilities ▾

I am an active school governor at my youngest child's school (Manor Park Infant School & Nursery), where I put some of my expertise to good use and help the community, as well as constantly learning new skills and techniques; taking full use of all the governor training facilities and events the local authority have to offer.

Cycling and fitness ▾

I am a keen cyclist - often, at weekends I enjoy riding with Sherwood Cycle Club and also enjoy cycling on my own when there is no cycle club rides, often at weekends and throughout the week. I have recently taken part in my second charity bike ride to Amsterdam; this time from starting at Nottingham, in aid of Prostate Cancer UK, cycling over 360 miles in 4 concurrent days.

Out of work technology ▾

A passion of mine, even outside work, is designing and developing bespoke website solutions using HTML, PHP, jQuery, AJAX and MySQL technologies. I have been creating website for my own personal use in several server-side and client-side technologies for over 10 years and enjoy it more and more each day. I
